Article Length: **According to task**

[**Fixed-** <mark>Please don't over-stretch any topic or add bluff/filler to increase word count, keep in mind that *Each sentence should convey a single idea*</mark>.]

Guidelines

☐ Don't just rephrase/rewrite from similar blog posts; rather, carry out extensive research to find new information unavailable on the competitor's site.

☐ Find/Research info from YouTube Videos, forums, User Community sites, and High Authority Authentic sources.

☐ Keep the description to the point and informative. Don't filler/bluff sentences with almost no contribution to the topics.

☐ Avoid using passive sentences; keep the sentences short.

☐ Maintain the flow between sentences and paragraphs throughout the article.

☐ Try to add YouTube Videos and a Table if possible.

☐ Write a combination with paragraph and bullet point format.

☐ Don't use AI tools to write articles.

☐ Add images where possible (You can take images from YouTube)

☐ Add statistics as much as possible with reference links.

☐ To create a higher value of an article, you can create a table, graph, and more unique things. So try to think out of the box.

<mark>(Note: All payments will be closed If I find somehow AI Generated Content)</mark>

Must Check Before Submission

● The intro has a proper snippet according to the instructions
● <mark>Add 2/3 external resources</mark> as an outbound link. We encourage taking the research paper link, government site, Wikipedia, and other non-competitor authority sites.
● *Provide research materials like this- https://prnt.sc/AqZqF-qpJuad*
● *Must check grammar and any miskicks.*

Additional Guides

Intro: ==70-120 words== **["**_keyword/similar LSI….?_**"** clearly provide the answer at the starting of the intro, then write something that will lead the reader to read the entire article, please avoid a generic approach **like this "we are going to cover or something similar"**. Rather provide info that will create interest naturally in readers' mind to read the entire article**.**

FAQs [==Start with a 25-30 words starter paragraph==, then cover 3/4 topics relevant questions. Answers must be short, direct, and logical; ==each answer will be 30-40 words long==**]**

Conclusion: ==70-120 words.== Carefully summarise the article and try to keep keyword or keyword-related LSI in the conclusion naturally. Please avoid a generic approach.
